Written Notice of Stipulated Settlement Agreement on Chlorpyrifos in California

As part of the Stipulated Settlement Agreement regarding the agricultural use of chlorpyrifos, executed on October 9, 2019, between Dow AgroSciences and the California Department of Pesticide Regulation, we are required to provide written notice to your organization about the terms of continued use. While the listed chlorpyrifos product registrations will lapse on December 31, 2019, the negotiated existing stock provisions will allow for continued use through December 31, 2020.

- Registrations will lapse at the end of the year.
- Dow AgroSciences will cease sales within 30 days after the effective date of the settlement agreement [i.e., November 8, 2019].
- Dealers/distributors will cease sales within 120 days after the effective date of the settlement agreement [i.e., February 6, 2020].
- Users can continue to use affected products until December 31, 2020. All use must comply with approved labeling for the product; the Chlorpyrifos Interim Recommended Permit Conditions issued by the Department in November 2018; and any other use restrictions imposed by the local county agricultural commissioner.
https://www.cdpr.ca.gov/docs/chlorpyrifos/pdf/general_notice_append_o.pdf
- Product take-back will occur through normal business practices/channels – with outreach to growers to explain the terms of continued use.

The California Department of Pesticide Regulation has issued a Notice of Use and Sale Conditions, available on its website, regarding this final disposition, and will be your resource regarding registrations of products by registrants other than Dow AgroSciences.

The following are the Dow AgroSciences' product registrations that will lapse and are subject to this Agreement:

- Cobalt (CA # 62719-575-AA);
- Cobalt Advanced (CA # 62719-615-AA);
- Dursban 50W in Water Soluble Packets (CA # 62719-72-ZA);
- Hatchet (CA # 62719-220-ZC);
- Lock-On Insecticide (CA #62719-79-ZA);
- Lorsban 75WG (CA # 62719-301-AA);
- Lorsban Advanced (CA # 62719-591-AA);
- Lorsban-4E (CA # 62719-220-ZA); and
- the special local needs registration for Lorsban 75WG for Control of Cabbage Aphid Infesting Brassica (Cole) Leafy Vegetables (CA SLN # CA-040026).
